

WalkNet

Walkable net worlds

WalkNet

Walkable net worlds

Walkable net structures made of reinforced fibre ropes create unique possibilities for designing indoor and outdoor spaces.

We plan, manufacture and install your WalkNet in individual shapes and colors. Our production makes it possible to select many details: Rope diameter, net knots, mesh sizes, net connections and free form finding.

We realize your project with planning and engineering, production and assembly through to documentation.

	WalkNet 12	WalkNet 16
Rope diameter	12 mm	16 mm
Rope type	4-strand, form B, braided strands	4-strand, form B, braided strands
Material	polyester multifilament high-strength, bonded	polyester multifilament high-strength, bonded
Reinforcement	spiral rope 1.8 mm, 7 x 7 galvanized	spiral rope 2.5 mm, 1 x 19 galvanized
Rope minimum breaking force	12 kN	32 kN

Polyester properties

- very good weather resistance
- moisture absorption 0.5 %
- melting point 260° C
- good acid resistance
- low alkali resistance

More product information

- other rope diameters on request
- mesh size from 100 mm and up
- color palette: beige, red, blue, yellow, orange, green, black
